

IT Network Tech *(CompTIA Network+)*

Washington Township Adult Education

In Partnership with MedCerts - online

Program Description

This career choice is ideal for the person who wishes to prepare for a career in the Information Technology field by obtaining a NATIONAL certifications CompTIA Network+. This 12 week program (192 hours) provides students with the skills and competence to advance their career in Information Technology. Earning Network+ Certification means that the students has the knowledge needed to use and maintain a wide range of networking technologies and validates their proficiency in networking administration and support. Developed by the Computing Technology Industry Association (CompTIA), the program is supported by industry leaders such as Microsoft, Dell, Hewlett-Packard and Novell. This course is designed to provide network technicians with the foundation-level skills they need to install, operate, manage, maintain, and troubleshoot a corporate network as well as topics such as the start menu, the desktop, managing files, folders, and libraries, as well as options for customizing the Windows 7 environment with relation to User Accounts, installing devices and printers, file management, and file protection techniques. Students will also learn how to use utilities such as System Restore and configure networking in Windows 7.

People with the Network+ certification can perform the following tasks.

- Manage and troubleshoot a basic network infrastructure, using common ports and networking protocols
- Understand and apply networking technologies and basic network design principles
- Install, configure and differentiate between common network devices
- Install and manage wired and wireless networks, adhering to standards and using modern testing tools
- Identify and troubleshoot performance and connectivity issues
